Acknowledgement.

Presentation, Inspiration and motivation have always played a key role in the success of any venture.

We express our sincere thanks to our CSE teacher **Sukhvir Kaur** to encourage us to the highest peak. We immensely obliged to her for her elevating inspiration, encouragement, guidance and kind supervision in completion of our project.

This project us to do lot of research in our coding part and different skills to enhance and boost our every skill. Thank you, mam, for assigning with this project.

Introduction.

Hypertext Markup Language (HTML) is a simple markup system used to create hypertext documents that are portable from one platform to another. This platform helps all the user to design and create different websites using different language like Html, CSS, JavaScript etc.

The main objective of this project is to design a dynamic and responsive website on an online frame for the coaching purpose. This website helps people to contact us and look at our work and decide that they want to give us chance to make their dreams comes true. This website is a user friendly for all its user.

Development Tools.

1. Vs Code and Bootstrap

2. Language: CSS and Html.

3. Web Browser: Google Chrome, Microsoft edge.

Body.

What is Coaching Institute?

Coaching centers offer classes as per subjects and help students to prepare well. Coaching centers offering specialized classes for Joint and Management entrances are already very popular. In the last few years many students have cracked entrance exams successfully after studying at these coaching centers.
